**Istanbul's history is as richly layered as one of its baklava pastries. The only city in the world that spans two continents, it is a bewitching dust-devil of cultures and influences spanning thousands of years. Follow in the footsteps of Florence Nightingale and see her story come alive in this fascinating city where you can step from Asia into Europe and back against a skyline studded with domes and slender haunting minarets.**

Upon your arrival you will transfer to your hotel. That afternoon Natasha McEnroe will give a fascinating talk on the battles that Florence Nightingale faced at Uskudar, the site of Scutari. This talk provides context to your visit to Scutari the following day and illustrates the challenges she faced and her achievements in overcoming them. Your first evening will be spent enjoying a welcome dinner.

The next morning visit one of Byzantine Istanbul's most imposing sights, the Aya Sophia. Its huge arching dome, encrusted with exquisite mosaics, appears to stand unsupported thanks to brilliant engineering. Continue to the Selimiye Barracks at Scutari, where Florence Nightingale tended thousands of Turkish and Allied soldiers during the Crimean War. During her two years here, she laid the foundations of modern nursing care and a museum has been dedicated to her in the northwest tower. Browse amongst her personal belongings and visit the British Cemetery before

seeing the old Kuleli Hospital. Take part in a delicious Istanbul culinary street food lunch and then visit the Suleymaniye Mosque with its collection of medical manuscripts. Later there is an enthralling talk on the stark realities of Nursing in the Victorian age. There is the option of seeing whirling dervishes perform in the evening.

Next morning travel to the Blue Mosque, a triumph of harmony, proportion and elegance. Built in 1603, the 'blue' of the mosque refers to the superb Iznik tiles that line the walls. Visit Topkapi Palace, the residence of Ottoman sultans for almost four centuries and a dazzling display of royal Islamic architecture, and the spectacular underground Roman cisterns nearby.
